

# Model 992 Extension Lead

for Standard Platinum Resistance Thermometers

- Allows for the extension of Isotech SPRTs
- Supplied with a matching LEMO connector
- Low thermal EMF
- Standard length of 10 metres
- Special lengths available to order

The Model 992 Extension Lead allows for the extension of Isotech SPRTs.

The cable shielded assembly features a high quality matching LEMO connector at one end and gold U shaped connectors at the other the other end for both the four SPRT connections and the cable screen.

The high quality low thermal EMF cable is the same as that used on the Isotech SPRTs

The standard lead length is 10 metres with other lengths available to special order.

The lead is supplied with a matching LEMO connector to fit to the SPRT, if the extension lead is ordered at the same time as an SPRT we can fit the connector to the thermometer for you.
